

I urge you to reject the NAB petition 04-160 seeking to restrict XM Radio's ability to provide traffic and weather conditions. Satellite radio provides a variety of entertainment and information programming that is not available from broadcast radio. The traffic and weather information are important to my safety and convenience. I pay for the service and do not believe the content or services should be controlled by the National Association of Broadcasters. Please reject the NAB petition 04-160.
